

Intelli-M Access ESSENTIALS

S-BASE-KIT

The infinias Intelli-M Access Control Base Software Kit provides all of the essentials needed to deliver broad access control capabilities to conveniently secure and manage your location, within a simple, intuitive browser-based user interface. The software allows you to view, monitor and report on any or all events and alarms; define multiple security roles, access and privileges for individual users, and use the powerful 'rules engine' to perform a variety of functions including: defining schedules and holiday sets, and designing, building and printing badges with Microsoft Report Builder 3.0.

KEY FEATURES

- ▶ **Customizable Rules Engine** In addition to common access control features, infinias' powerful rules engine allows you to build your own. Define events, advanced filters, and actions to create an unlimited set of custom features – that deliver the RESULTS required for your application. With infinias, the power is in your hands.
- ▶ **People & Groups** Easy management. Manage people, groups, roles, privileges and credentials from a single screen.
- ▶ **Door Status** Improve monitoring. Status icons provide improved door status monitoring. Hover over an image in the legend to bring up a tool tip that explains the icon.
- ▶ **Auto Discovery** Simplify configuration. Auto discovery of door controllers makes configuration easy. Any additional doors added to the system at a later date can benefit from auto discovery as well.
- ▶ **Badges and Reports** Run reports and create badges. Intelli-M Access uses Microsoft's SQL Server Reporting Services to host badges and reports. Many IT groups already use this solution internally and have their own SQL expertise.
